

Admission Infection Prevention Education

Welcome. Please help us prevent the spread of infection:

W

Wash your hands or use hand sanitizer before you eat, before you touch your nose, mouth or eyes, and after using the bathroom.

E

Expect our staff to clean their hands before patient care. Remind them if they forget.

C

Cover your sneeze or cough with a tissue or your upper arm. Tell visitors to not come in if they are sick.

A

Advise your visitors to avoid touching anything used to care for patients.

R

Read and follow all instructions given to you by your healthcare team.

E

Eliminate germs when you go home by using disinfectants such as sprays and wipes, and clean hard surfaces often.
